### **Message from the Guest Editor**

Dear Colleagues,

It is a pleasure to invite you to submit manuscripts to the forthcoming Special Issue, “Bone Augmentation in Dentistry”.

In daily clinical practice, we must deal with people with insufficient alveolar ridge volumes who wish to receive an implant. Therefore, we are forced to use regenerative techniques to increase the bone volume. In this Special Issue, we aim to include articles presenting innovative techniques that can prevent the excessive bone resorption of the alveolar ridge after tooth extraction, or that can regenerate lost bone volume via regeneration performed before or during dental implant placement.

As a member of the *Dentistry* Editorial Board, I invite you to submit a high-quality article on this topic. I thank you in advance and wish you the best.
