closed (20 November 2021)

Message from the Guest Editor

This Special Issue will gather a wide range of perspectives and discussions on practical and theoretical aspects of contemporary architectural design and the rehabilitation of built heritage. The architectural, constructive, and technical possibilities that can be used in the rehabilitation of built heritage should also be approached. The geographical scope of this Special Issue is global, comprising urban and rural contexts. We welcome both original research studies and literature reviews based on case studies as well as theoretical and methodological approaches regarding contemporary architectural design and the rehabilitation of built heritage. Submissions are encouraged on, but not limited to, the areas mentioned keywords listed.

Message from the Editor-in-Chief

Designs (ISSN 2411-9660) is a peer-reviewed and open access journal which provides a unifying research framework for a wide range of engineering designs of disciplines and industrial applications, including mechanical engineering, electrical engineering, civil engineering, mechatronics, aerospace engineering, bioengineering, energy engineering, industrial engineering and manufacturing systems are of interest. We would like to invite you to contribute to the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, Inspec, and other databases.

Journal Rank: CiteScore - Q2 (*Engineering (miscellaneous)*)
