Message from the Guest Editor

Dear Colleagues,

Pancreatic cancer is the second-most-frequent gastrointestinal malignancy and carries a poor quality of life and prognosis. The current standard of care is surgery resection, if possible, as well as systemic chemoradiation therapy in locally advanced, unresectable disease. Endoscopic ultrasound (EUS) is a well-established and valid technique for the diagnosis and staging of pancreatic cancer. Therapeutic EUS for the treatment of pancreatic neoplastic lesions is a rapidly expanding field with different options, including fine needle injection therapy, radiofrequency, cryothermal ablation and brachytherapy. A complete review of alternative EUS-guided ablative techniques will be extremely valuable in providing new directions for upcoming research.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
