Deadline for manuscript submissions:

30 April 2024

Message from the Guest Editors

Dear Colleagues,

After the publication of the 5th WHO Classification of CNS Tumors, it became clear that the application of molecular biology techniques in pathologists' diagnostic practice is becoming increasingly fundamental. However, along with the beneficial influence of molecular advances, there are many diagnostic issues regarding the application of molecular tests, the interpretation of results in particular cases, and the classification of proposed new entities.

This Research Topic aims to share new insights regarding pathology and diagnostic issues in CNS tumors. The goal is to discuss new perspectives in terms of classification, diagnosis, prognosis, and possible therapeutic perspectives in CNS tumors.

Dr. Antonio d'Amati

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
