The Advanced Role of Artificial Intelligence in Personalized Disease Classification and Evaluation

Guest Editors:

Dr. Javeria Amin
Department of Computer Science, University of Wah, Wah Cantt, Pakistan

Dr. Muhammad Almas Anjum
National University of Technology (NUTECH), Islamabad 44000, Pakistan

Message from the Guest Editors

the objective of this Special Issue is to deliver the most recent AI research in the domain of medical image processing and analysis. Submissions about novel AI models for medical image analysis are welcome. To address the variations in image spatial–temporal resolution as well as the diversity of biophysical–biochemical mechanisms, contributions addressing other aspects of medical image processing (including, but not limited to, image enhancement, reconstruction/restoration/registration of images, segmentation, feature extraction/selection and classification are also welcomed. We invite researchers to submit original research articles as well as review articles that discuss the difficulties encountered by artificial intelligence techniques in the analysis of medical images.

Special Issue

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
