Université de Rennes, LTSI – UMR  
1099, F-35000 Rennes, France

Deadline for manuscript  
submissions:

**closed (31 January 2024)**

### Message from the Guest Editor

Digital pathology is revolutionizing the field by converting glass slides into digital slides. These slides can be easily viewed, analyzed on a computer monitor, managed with annotations and tag selections, and shared in research, teaching, or expertise networks. Digital pathology has made it possible to change the diagnosis workflow, generate big data, and develop and apply artificial intelligence (AI) models. Image analysis is able to extract quantitative and complex data from digitized whole-slide images. AI algorithms generated by machine learning are mainly used for detection, the quantification of biomarkers, or the prediction of prognosis, responses to therapy, or molecular alterations. This Special Issue is dedicated to the applications of digital pathology and AI in the diagnosis, prognosis, and prediction of disease. Indeed, digital pathology can improve the accuracy of a diagnosis by improving analysis and reducing errors. In addition, AI is also crucial to enhancing productivity by improving workflows and reducing time analysis thanks to automatic screening and the quantification of biomarkers.

## Editor-in-Chief

### Prof. Dr. Andreas Kjaer

Department of Clinical  
Physiology, Nuclear Medicine &  
PET National University Hospital,  
Rigshospitalet, University of  
Copenhagen, Blegdamsvej 9, DK-  
2100 Copenhagen, Denmark

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*)
