### Message from the Guest Editors

Artificial intelligence (AI) has received enormous attention and has transitioned from being a purely statistical tool to being one of the main drivers of modern medicine. Every field has enthusiastically opted for artificial intelligence, and the field of dental medicine is no exception. Al represents an effective approach for analyzing clinical dental data. The Special Issue aims to highlight the recent progress and trends in utilizing AI techniques, such as machine learning and deep learning, for detecting, screening, diagnosing, and monitoring numerous dental diseases and treatments in diverse clinical practices and in the basic research of dental medicine.
