Gianturco n. 113, 80143 Napoli,  
Italy

Deadline for manuscript  
submissions:

**closed (30 September 2022)**

### Message from the Guest Editors

Leukemia is a highly heterogeneous disease caused by the malignant transformation of undifferentiated myeloid/lymphoid hematopoietic progenitors.

The identification of new leukemia biomarkers represents a crucial step for diagnosis, prognosis and treatment. Currently, cytogenetic markers are widely used for diagnosis and patient stratification. However, the situation is rapidly changing due to the application of other methodologies based on the characterization of disease-causing mutations and of epigenetic and proteomic profiles. In this Special Issue, we are inviting the submission of reviews and novel research results in the field. In this Special Issue, special attention will be given to manuscripts highlighting the interplay between the search for new biomarkers and the elucidation of the molecular basis of this widespread disease. Moreover, articles dealing with identifying surface antigens in leukemia to plan novel CAR-T-mediated cellular therapy will be welcome.

## Editor-in-Chief

### Prof. Dr. Andreas Kjaer

Department of Clinical  
Physiology, Nuclear Medicine &  
PET National University Hospital,  
Rigshospitalet, University of  
Copenhagen, Blegdamsvej 9, DK-  
2100 Copenhagen, Denmark

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*)
