Digital Machine Learning and Software Product Development Processes

Guest Editors:

Prof. Dr. Vassilis C. Gerogiannis

Department of Digital Systems, Faculty of Technology, University of Thessaly, Geopolis Campus, GR 41500 Larissa, Greece

Prof. Dr. Elpiniki I. Papageorgiou

Department of Energy Systems, Faculty of Technology, University of Thessaly, Geopolis Campus, GR 41500 Larissa, Greece

Dr. George Kakarontzas

Department of Digital Systems, Faculty of Technology, University of Thessaly, Geopolis Campus, GR 41500 Larissa, Greece

Deadline for manuscript submissions:
closed (20 April 2022)

Message from the Guest Editors

Topics of interest include, but not limited to:

- **Algorithms**: Active Learning; Classification; Clustering; Multitask and Transfer Learning; Unsupervised Learning, etc.
- **Deep Learning**: Adversarial Networks; Generative Models; Recurrent Networks; Supervised Deep Networks; etc.
- **Reinforcement Learning and Planning**: Decision and Control; Exploration; Planning; etc.
- **Machine Learning Performance Evaluation and Monitoring**: Metrics and Measures; Online Evaluating methods; Bandits; Objective Functions; etc
- **Machine Learning Product Metrics**: Key Performance Indicators; Business Strategy; Product Vision, etc.
- **Continuous Integration in Machine Learning**: Software Development Life Cycles; Test Driven Development; Data as Code, etc.
- **Continuous Deployment in Machine Learing**: Model Version Control; Quality Assurance; Load Balancing; Monitoring; Online Feedback and Retraining, etc.
- **Social Aspects of Machine Learing**: AI Safety; Fairness and Accountability; Privacy, etc.

Special Issue
