Message from the Guest Editor

Dear Colleagues,

Nutritional research has become important in appetite regulation with improvements in health relevant to healthy diets and the prevention of chronic disease and Alzheimer's disease. The origins of metabolic diseases may involve the dysregulation of hormones, nuclear receptors, and neuropeptides in the brain and peripheral tissues. Nutritional research is now essential to promote mitochondrial biogenesis that is connected to appetite regulation in both chronic and neurodegenerative diseases. The links between appetite dysregulation, endocrinology, and metabolism implicate the peptide apelin and the nuclear receptor Sirtuin 1 (Sirt 1) to be defective and involved in NAFLD and Alzheimer's disease. Appetite regulation is now critical to the prevention of brain disorder therapy that may involve the reversal of synaptic plasticity defects that link diabetes to neurodegenerative diseases.

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2023).
