submissions:

**closed (15 May 2023)**

### Message from the Guest Editor

Dear Colleagues,

The climatic challenges faced by species at their geographic limits of distribution will integrate both thermal and water limitations. Because of this, we need a predictive theory and a plentiful dataset for species capacity to deal with thermal and hydric challenges in their environment, and for the populational consequences of failing to do so. In this Special Issue, we will publish high-quality contributions from international authors dealing with this pressing topic. Contributions may be papers describing perspectives, meta-analyses, comparative analyses, or even local case studies that advance core concepts or provide new data on species' thermal and hydric tolerance.

Dr. Agustín Camacho

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
