## Diversity, Distribution and Zoogeography of Coleoptera

Guest Editors:

**Prof. Dr. Massimo Meregalli**

Department of Life Sciences and  
Systems Biology, University of  
Torino, Via Accademia Albertina  
13, 10123 Torino, Italy

**Dr. Pier Mauro Giachino**

World Biodiversity Association  
Onlus, I-10010 San Martino  
Canavese, Italy

Deadline for manuscript  
submissions:

**30 November 2024**

### Message from the Guest Editors

A good taxonomic knowledge is the starting point for any study by conservationists, ecologists, biodiversity scientists, and many others, who rely heavily on taxonomic information to manage, conserve, use, and share our biodiversity. Unfortunately, even though roughly 400,000 taxa of Coleoptera—the largest of all orders—have been described, a much higher number of species remain unknown, particularly from coenoses that have the highest ecological importance and are highly threatened, such as tropical forests. The worldwide shortage of this essential taxonomic information, the gaps in our taxonomic knowledge, and the paucity of trained taxonomists has come to be known as the taxonomic impediment. Any effort that helps to increase the knowledge of Coleoptera is therefore highly welcome.

The purpose of this Special Issue is to provide a space to accommodate important contributions to the knowledge of Coleoptera biodiversity, and to provide information on the current state of zoogeographical information about the order of insects with the largest number of species in the world.

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
