Message from the Guest Editors

Dear Colleagues,

Mountains encompass more than 30% of all land and 23% of the Earth's forests with high levels of biodiversity and endemism, and support diverse habitats and refuges for approximately 85% of global amphibian, bird, and mammal species. More than 1/4 of the global human population inhabits mountain environments, many of whom are among the world's poorest people. Local communities depend on the ecosystem services from mountainous regions to earn their living. However, the earth has experienced a significant transformation due to global change, i.e., agriculture and the exploitation of natural resources by human activities and extreme climate events. In particular, the consequences for the losses of biodiversity and ecosystem functioning are obvious in phenomenon but are largely unknown in mechanism across mountainous regions.

Message from the Editor-in-Chief

Diversity (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
