Application and Challenges of UAV in Space-Air-Ground Integrated Communication Network

Guest Editors:

Dr. Peiying Zhang

Prof. Dr. Sheng Wu

Dr. Zakarya Muhammad

Prof. Dr. Guanjun Xu

Deadline for manuscript
submissions:

closed (16 January 2024)

Message from the Guest Editors

At present, the continuous progress of information and network technology has become the leading force of innovation-driven development, which has a profound impact on the political, military, economic, and cultural fields, as well as others. In recent years, the information network has been gradually integrated and developed. Relevant research has put forward the development vision of the space-space integrated information network and the space-space integrated wireless communication network based on the 6th generation mobile communication technology (6G). As a new network architecture paradigm, the technical development of the space-air-ground integrated network has gradually become a main research topic. This topic aims to bring together relevant researchers from the industry and academia to share their latest discoveries and developments in this field.

Message from the Editor-in-Chief

Drones is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. *Drones* publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. *Drones* seeks to provide a central forum for scholars engaged in drones' research and applications.

There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Remote Sensing*) / CiteScore - Q1 (*Aerospace Engineering*)
