Deadline for manuscript
submissions:

18 October 2024

Message from the Guest Editors

Dear Colleagues,

Space–air–ground integrated networks (SAGINs) have been an important research direction for 6G. Terrestrial networks are insufficient for fulfilling Internet service demand, and there are 3 billion people all over the world living without Internet access. Satellite communication makes up for the shortage of terrestrial networks, with its advantages including wide coverage and support for massive access services. With the fast development of low-Earth-orbit (LEO) satellite constellations, e.g., Starlink and OneWeb, satellite communication has become an indispensable part of space-air-ground integrated networks.

Prospective authors with original research articles and reviews are invited to submit articles on topics related to “Space–Air–Ground Integrated Networks for 6G”. We look forward to receiving your contributions.

Message from the Editor-in-Chief

Drones is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. *Drones* publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. *Drones* seeks to provide a central forum for scholars engaged in drones' research and applications.

There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Remote Sensing*) / CiteScore - Q1 (*Aerospace Engineering*)
