# **Drones for Biodiversity Conservation**

Guest Editors:

### Dr. Margarita Mulero-Pazmany

Department of Animal Biology, University of Malaga, 29010 Malaga, Spain

#### Dr. Barbara Bollard

Drone Lab, Auckland University of Technology, 55 Wellesley Street East, Auckland CBD, Auckland 1010, New Zealand

Deadline for manuscript submissions:

closed (30 September 2022)

## **Message from the Guest Editors**

In recent years, biodiversity loss has been taking place globally and at an unprecedented pace. There is an urgent need to collect basic data on plants' and animals' abundance and distribution that will eventually help to understand the changes that are taking place. Ecologists, conservationists, and wildlife managers are increasingly keen to incorporate new technologies that allow gathering field data in efficient and cost-effective ways. Drones (unmanned aircraft systems (UAS)) equipped with visible, thermal or multispectral cameras that provide high spatiotemporal resolution information have recently become popular tools for conducting surveys, assessing the state of ecosystems, and assessing the effects of environmental changes. This Special Issue aims at bringing together scientists, developers, and advanced users who apply drone technology for biodiversity studies.

## **Editor-in-Chief**

### Prof. Dr. Diego González-Aguilera

Cartographic and Land Engineering Department, Higher Polytechnic School of Avila, University of Salamanca, Hornos Caleros, 50, 05003 Avila, Spain

## **Message from the Editor-in-Chief**

Drones is the only international open-access journal about the science, policy and technology of drones and its applications. Nowadays, the proliferation of drones is a reality for local policy makers, regulatory bodies, mapping authorities, startups and consolidated companies. There are many uses and benefits of drones: from the emergence of new sensors and the evolution of new platforms; to the development of specific software and the emergence of new applications. Drones publishes reviews, regular research papers, communications and short notes, without restriction on the length of papers. Drones seeks to provide a central forum for scholars engaged in drones' research and applications.

There is a need for high quality papers in this area and the *Drones* Editorial Board are widely recognized international leaders. *Drones* journal guarantees a serious peer review and a rapid publication across the whole discipline of drones.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility**: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Aerospace Engineering)
