Technology, 7491 Trondheim,
Norway

Deadline for manuscript
submissions:

20 September 2024

Message from the Guest Editor

Dear Colleagues,

Recent years have borne witness to the proliferation of modern sensors and actuation equipment with ever-increasing processing power and built-in communication capabilities. As a direct result, most modern monitoring and control systems, generally referred to as multi-agent networked systems or multi-agent systems for short, have come to be characterised as multiple autonomous agents interacting over an ad hoc network to achieve a common goal.

This Special Issue focuses on fully distributed optimisation techniques derived to enable multi-agent systems to observe, learn, and implement optimal decisions to achieve a common goal. Moreover, applications of these distributed optimisation techniques in modelling social behaviour of robots and humans, internet of things (IoT), smart energy distribution systems, federated learning, distributed estimation, decentralised control, and autonomous vehicles are of particular interest.

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
