Future Trends in Applications of Neural Networks for Vision-Based Autonomous Tasks

Guest Editors:

Dr. Vijay Kakani
Department of Integrated System Engineering, School of Global Convergence Studies, Inha University, 100 Inharo, Nam-gu, Incheon 22212, Republic of Korea

Dr. Ákos Odry
Department of Mechatronics and Automation, Faculty of Engineering, University of Szeged, 6725 Szeged, Hungary

Deadline for manuscript submissions:
closed (15 May 2024)

Message from the Guest Editors

The field of computer vision has experienced remarkable growth in recent years, mainly due to the use of neural networks. Autonomous vision-based applications have become essential in a variety of industries from autonomous driving robotics to surveillance and augmented reality. These neural-network-powered systems have changed the landscape of visual awareness, enabling machines to understand, meet and interact with the world around them. This Special Issue provides a platform to explore and discuss the latest applications, developments and future directions in the use of neural networks for autonomous vision-based tasks.

We invite contributions demonstrating new applications or improvements in neural networks applied in areas including, but not limited to, the following:

- **Autonomous Navigation and Robot Control**
- **Computer vision for autonomous vehicles**
- **Inspection and Security:**
- **Environmental Research and Agriculture:**

Special Issue

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.
Journal Rank: JCR - Q2(*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
