

Advances in Antennas and Wireless Propagation

Guest Editors:

Dr. Muhammad Afzal

Dr. Yang Yang

Dr. Roy B. V. B. Simorangkir

Prof. Dr. Karu P. Esselle

Deadline for manuscript
submissions:

closed (28 February 2022)

Message from the Guest Editors

Advances in wireless technologies and diverse applications demand novel design, techniques, and materials to realize compatible front-end antennas. Researchers from both academia and industry are striving to solve technical challenges with diverse solutions. Potential topics for this Special Issue include but are not limited to:

front-end antennas;
textile, wearable, and flexible antennas;
subterahertz and terahertz antenna technologies;
5G and millimetre wave antennas;
metasurfaces and metamaterials theory, design, and applications;
reflectarrays, transmitarrays, and lenses;
design, simulation, and modelling of passive filter;
3D printing technology for wireless applications.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
