Message from the Guest Editors

This Special Issue aims to promote and share research and innovation in data science methods, systems and solutions, and data-driven methodologies and applications. It mainly focuses on:

- Advances in data science and data management methodologies, systems, and applications.
- Intelligent data-intensive systems and data engine architectures.
- Advances in AI and ML methods in engineering, computer science, physical, social, and life sciences, with a particular emphasis on ethical issues, fairness, and accountability.
- Recommendations for people and analysts as well as policy makers.
- Outlining academic and industrial needs and proposing future research directions and agendas.

We are specifically soliciting technical, experimental, and methodological manuscripts, application reports, and field reports on data-intensive applications.

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
