Message from the Guest Editors

Dear Colleagues,

Power and energy conversion, distribution and management face critical challenges in the current context of energy transition. Novel equipment designs, control strategies, approaches and techniques are being developed to achieve the necessary improvements in full-scale power systems. Integrating renewable energy sources, storage and distribution in a conventional electrical grid network is also a fundamental milestone toward achieving the smart grid concept. Novel emerging energy vectors, such as marine power and biofuels, and classical energy vectors, such as wind or solar energy, constitute the distributed generational core of future smart grid. Their integration should be able to cope with the associated generation intermittencies and uncertainties.

The scope of this Special Issue comprises renewable energies conversion efficiency, enhancement in power quality, applied techniques for electrical machines and generation, novel power electronic equipment, smart sensors, renewable energies integration, marine power, on-shore and off-shore wind power, solar power, biofuels and biomass.

an Open Access Journal by MDPI

Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
