Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

Dear Colleagues,

Since its establishment in 1824, the University of Manchester (UoM) has been at the forefront of fostering knowledge. With milestones such as the development of the world's first stored-program computer and the groundbreaking discovery of graphene, the university has consistently showcased its commitment to pioneering research and academic excellence.

Marking the 200th anniversary of the UoM, this Special Issue aims to highlight state-of-the-art research in Electrical and Electronic Engineering. We invite submissions that delve into the recent advancements in, but not limited to, smart buildings, power systems, robotics, and control. Contributions may encompass theoretical innovations, experimental investigations, or comprehensive reviews of a specific area.

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
