Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue of *Electronics* is to gather cutting-edge research in the field of “digital twin” for future applications. We invite researchers to contribute original and unique articles, as well as sophisticated review articles in the field of medical imaging (ultrasound, optical, photoacoustic, X-ray, nuclear, magnetic resonance, etc.) and image processing, computational fluid dynamics, and artificial intelligence.

Topics of interest include, but are not limited to the following areas:

- New sensors and detector technologies;
- Wearable devices;
- Algorithms for fast image acquisition and reconstruction;
- Multimodal medical image analysis and fusion;
- Signal and imaging integration;
- 3D virtual models;
- 3D printing;
- Augmented reality and virtual reality;
- Finite element analysis;
- Computational fluid dynamics;
- Modelling and analysis;
- Machine learning;

an Open Access Journal by MDPI

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
