

## Automation and Electrical Grids

Guest Editors:

**Dr. Thomas Strasser**

**Prof. Dr. Peter Palensky**

**Prof. Dr. Antonello Monti**

Deadline for manuscript  
submissions:

**closed (30 June 2021)**

### Message from the Guest Editors

The domain of power and energy systems is undergoing a major change in terms of operation and planning. The advancement into a so-called smart energy system or a smart grid produces new challenges. With the introduction of distributed, renewable generation (solar, wind, small hydro power, etc.) and controllable loads (electric vehicles, energy storage systems, heat pumps, etc.), new and advanced automation, control, and Information and Communication Technology concepts and corresponding methods are required in order to cope with these new challenges. The aim of this Special Issue, therefore, is to tackle the ongoing digitalization-related changes and innovations in the domain of power and energy systems. We invite all papers with novel contributions to the field of automation and electrical grids relating to the following topics:

- Distribution automation and SCADA systems;
- Demand-side and energy management systems;
- Distributed automation concepts for cyber–physical energy systems;
- Advanced information and communication systems;
- Self-healing systems covering fault location, isolation, service restoration, etc.;
- Application of smart grid-related automation standards.

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
