### Message from the Guest Editors

Dear Colleagues,

This Special Issue is a continuation of the original "New Trends of Power Electronics Technology and Application in Energy Field" issue, it will cover a variety of subjects concerning power electronics technology, such as fuel cell technology; development of clean energy; and design of self-powered sensors, triboelectric nanogenerator and powertrain systems. In addition, papers focusing on power electronics' applications in the energy field, such as in energy conservation, geological equipment, geological hazard monitoring, mechatronic measurement and vehicle power transmissions, are welcome.

Prof. Dr. Wenjian Yang

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
