Energy and Environmental Economic Theory and Policy

Guest Editors:

Prof. Dr. Ofira Ayalon

School of Environmental
Sciences, Natural Resource &
Environmental Research Center,
University of Haifa, Haifa 31905,
Israel

Dr. Ruslana Rachel Palatnik

1. School of Environmental
Sciences, Natural Resource &
Environmental Research Center,
University of Haifa, Haifa 31905,
Israel
2. Department of Economics and
Management, The Max Stern
Yezreel Valley College, Afula,
Israel

Deadline for manuscript
submissions:

9 October 2024

Message from the Guest Editors

The intersection of energy and environmental economics stands at the forefront of addressing some of the most pressing challenges facing society today. As the global community strives for sustainable development and seeks to mitigate climate change, thorough economic analyses and effective policy solutions are essential. This Special Issue aims to provide a platform for cutting-edge research that advances our understanding of the complex interactions between energy systems, environmental sustainability, and economic dynamics. We invite scholars from various disciplines to contribute their insights and expertise to this vital discourse.

Topics of interest for publication include, but are not limited to, the following:

- Energy transition and decarbonization, including equity and income distribution issues.
- Energy policy design and assessment.
- Market-based approaches for energy and environmental governance.
- EEE—energy–economy–environment nexus.
- Economics of climate change mitigation.
- Energy-related behavioral economics.
- Economics of equity and justice in energy.

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
