Machine Learning and Optimization for Energy Systems

Guest Editors:

Dr. Spyros Giannelos

Department of Electrical and
Electronic Engineering, Faculty of
Engineering, Imperial College
London, London, UK

Dr. Danny Pudjianto

Department of Electrical and
Electronic Engineering, Imperial
College London, London, UK

Deadline for manuscript
submissions:

15 May 2024

Message from the Guest Editors

This Special Issue welcomes contributions on machine learning applied to power systems. This may include forecasts or any other type of application of machine learning to power systems.

In terms of optimization, the Special Issue welcomes contributions on this topic and specifically stochastic optimization.

This can also include contributions in which both optimization and machine learning are combined in relation to power systems.

Given the uncertainty that characterizes energy systems, contributions in this area can be very helpful to the wider power systems community, as they can provide significant insights into new methods and concepts in these evolving fields.

Topics of interest for publication include, but are not limited to, the following:

- Machine learning forecasting methods related to power systems;
- Other machine learning applications to power systems;
- Topics that involve the application of optimization within the context of machine learning;
- Case studies can include the following topics: electric vehicles, energy investments, network planning, etc.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
