Advances and Challenges in Sub-Seafloor CO₂ Storage

Guest Editors:

Dr. Hector Marin Moreno

Norwegian Geotechnical
Institute, PB 3930 Ullevål Stadion,
N-0806 Oslo, Norway

Dr. Joonsang Park

Section of Geohazards and
Dynamics, Norwegian
Geotechnical Institute, 3930 Oslo,
Norway

Deadline for manuscript
submissions:

closed (20 December 2021)

Message from the Guest Editors

Dear Colleagues,

This Special Issue 'Advances and Challenges in Sub-Seafloor CO₂ Storage' of *Energies* is seeking innovative, informative, and multi-disciplinary research contributions in the broad topic of sub-seafloor CO₂ storage including but not limited to the following:

- Thermo-hydro-mechano-chemical coupled processes
- Thermal loading in the reservoir and caprock
- CO₂ leakage pathways
- Spatial scale-dependent processes – near well vs far well changes
- Time-lapse monitoring from remote geophysical data
- Induced seismicity and geophysical data relation to geomechanical changes
- CO₂ storage in a liquid phase and in hydrate
- Laboratory and field to micro-scale numerical modeling studies
- Comprehensive case studies on active and potential CO₂ storage reservoirs

Feel free to contact the Guest Editors with a title and brief outline of your paper content, to assess whether it would fit within the scope of this Special Issue.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
