## Artificial Intelligence for Smart Energy Systems

Guest Editors:

**Prof. Dr. Goreti Marreiros**

GECAD, Institute of Engineering,  
Polytechnic of Porto, 4200-072  
Porto, Portugal

**Prof. Dr. Zita Vale**

GECAD-Research Group on  
Intelligent Engineering and  
Computing for Advanced  
Innovation and Development,  
Polytechnic of Porto (P.PORTO),  
P-4200-465 Porto, Portugal

**Prof. Dr. Bo Nørregaard  
Jørgensen**

Center for Energy Informatics,  
University of Southern Denmark,  
5230 Odense, Denmark

### Message from the Guest Editors

In recent years, with the development of Information and Communication Technologies (ICT) and the advent of Artificial Intelligence, technology has become immerse in all major industry sectors, and the power and energy sector is no exception.

This Special Issue aims at making known the most relevant advances on the development of smart energy systems that are grounded in Artificial Intelligence techniques such as machine learning, multiagent systems, and semantics. The ultimate goal is to identify the most promising approaches for each of the current and future challenges in the power and energy sector as well as to provide readers with a set of concrete applications of Artificial Intelligence that have the potential to be the basis for more intelligent, inclusive, and sustainable energy industry and use.

Deadline for manuscript  
submissions:

**closed (31 December 2021)**

## Editor-in-Chief

### Prof. Dr. Enrico Sciubba

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
