Message from the Guest Editors

Dear Colleagues,

Given the current and future development of IoT and smart computing, automation and robotics are entering a new era of innovation and applications. Robotics is becoming a part of cyberphysical space to examine movements and energy consumption. This ultimately introduces new challenges on how to manage Industry 4.0 to increase the highest quality and higher production rates of products and productivity. The energy consumption changes profitability. Therefore, the study of energy consumption in cyberphysical space is also necessary.

This Special Issue aims at encouraging researchers to address solutions to overcome the issue.

Dr. habil Géza Husi

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
