**Dr. Mariola Zalewska**

Faculty of Management, University of Warsaw, ul. Szturmowa 1/3, 02-678 Warszawa, Poland

### Message from the Guest Editors

For almost three decades, the European energy market has been fundamentally transformed. This mainly concerns harmonisation and liberalisation of the internal energy market in the European Union (EU) and transformations towards low-emission economies. The liberalisation and harmonisation of the EU's internal energy market aims primarily at creating a more flexible, competitive, and customer-oriented market with market-based supply prices. The aim of the regulators is to solve energy poverty, clarify the roles and responsibilities of market participants and regulators, address security of supply of electricity, gas and oil, and the development of trans-European transmission networks.

In this context, the following issues are of interest: changes in and around energy markets within EU structures (e.g., consumption, prices, use of renewable energy sources), trends in these markets, the behaviour of market participants, the transformation of energy systems from large power generation units to local resources, prosumer's energy production, etc.

Deadline for manuscript submissions:

**closed (25 July 2023)**

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
