Impact of Mine Activity on Water Environment

Guest Editors:

Prof. Dr. Jacek Motyka

Prof. Dr. Kajetan d'Obyrn

Prof. Dr. Adam Postawa

Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editors

The topics of interest include but are not limited to:

- Methodology and results of estimating the range, and dynamics of the development of the mining drainage area;
- The impact of mining drainage on surface waters;
- Changes in the quality of surface and ground waters related to the activation of various sources of pollution;
- Acid mine drainage (AMD) and neutral mine drainage (NMD);
- Dynamics of reconstruction of the groundwater table after cessation of the dewatering of workings;
- Changes in the quality of surface and ground waters due to the cessation of mining drainage.

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
