Soft Computing Techniques in Energy System

Guest Editors:

**Prof. Dr. Cesar Hervás
Martínez**

Department of Computer
Sciences and Numerical Analysis,
University of Cordoba, 14071
Cordoba, Spain

Prof. Dr. Sancho Salcedo-Sanz

Department of Signal Processing
and Communications,
Universidad de Alcalá, 28801
Alcalá de Henares, Madrid, Spain

Dr. Pedro Antonio Gutiérrez

Department of Computer
Sciences and Numerical Analysis,
University of Cordoba, 14071
Cordoba, Spain

Deadline for manuscript
submissions:

closed (15 January 2021)

Message from the Guest Editors

Nowadays, the development of Information Technologies has led to a new era in computation, affecting almost all fields in Science and Engineering. Specifically, Soft Computing techniques, as a branch of Artificial Intelligence aiming to obtain more robust and human-behaving systems, have proven to be excellent tools to cope with difficult problems that arise in a huge variety of applications in the Energy field. Soft-Computing techniques applied to energy-related problems usually face data-driven tasks, such as optimization, classification, clustering or prediction problems, among others. In many cases, these problems are in close connection with alternative applications such as Renewable Energy resource evaluation, design of energy efficiency systems, or very different energy system applications in smart grids, etc. This Special Issue deals with Soft-Computing techniques in the Energy System, from a broad range, from the methodology and application points of views. Articles discussing new algorithms with application in energy problems, or revisited algorithms providing good solutions to hard problems in energy-related applications, are welcomed...

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
