New Trends in Thermal Energy Storage: Materials and Technologies

Guest Editor:

Dr. Elpida Piperopoulos

Department of Engineering,
University of Messina, 98166
Messina, Italy

Deadline for manuscript
submissions:

closed (30 April 2022)

Message from the Guest Editor

In this Special Issue, dedicated to new trends in thermal energy storage technologies, original research papers, as well as reviews, are welcome. The aim is to collect contributions on sensible, latent, and thermochemical heat storage systems and materials, employed at low, medium, and/or high-temperature TES for heating and cooling. Studies on waste heat recovery technologies are also appreciated. In such a context, particular consideration will be given to research development in order to increase the applicability of TES technology.

This Special Issue will provide the scientific community with a thorough overview of current research on innovative thermal energy storage materials and systems and their application fields.

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
