Energy Conservation and Carbon Mitigation Technology of Buildings

Guest Editors:

Dr. Wandong Zheng

School of Environmental Science
and Engineering, Tianjin
University, Tianjin 300350, China

Dr. Xiangkun (Elvis) Cao

Department of Chemical
Engineering, Massachusetts
Institute of Technology,
Cambridge, MA, USA

Dr. Chuang Wen

Faculty of Environment, Science
and Economy, University of
Exeter, Exeter EX4 4QF, UK

Deadline for manuscript
submissions:

closed (31 October 2023)

Message from the Guest Editors

We call for papers that focus on the technology and method for achieving building decarbonization from a theoretical and practical perspective. The studies in carbon mitigation management and policy for the building sector worldwide are welcome. The research topic is intended as a state-of-the-art resource for researchers, practitioners, and decision-makers interested in assessing the pathways to carbon neutrality in low-carbon buildings and communities. Topics of interest for the Special Issue include, but are not limited to, the following:

- Application of renewable energy in buildings.
- CCUS technology for building decarbonization.
- Energy conservation technology for buildings.
- Low-carbon buildings and communities.
- Pathways for building decarbonization.
- Energy flexibility of buildings.
- Demand response management and control.
- Integrated energy networks and microgrids.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
