Deadline for manuscript
submissions:

closed (20 April 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Energies* intends to collect and disseminate the latest research and developments related to “Advances in Dynamic Voltage Restorers.” The topics of interest include, but are not limited to:

- active power conditioners (dynamic voltage restorers (DVR), unified power quality conditioners (UPQC), active power filters, hybrid filters)
- control techniques for the improvement of active power conditioners (power theories, signal processing techniques)
- advanced active power conditioners monitoring (smart meters, phasor measurement unit, signal processing technics, event classification)
- Topologies and power devices for series compensation
- Fault tolerance in series compensation devices
- Energy storage systems and other methods to improve the compensation time

Prof. Marcelo Cabral Cavalcanti

Prof. Leonardo Rodrigues Limongi

Prof. Gustavo Medeiros de Souza Azevedo

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
