## Advances in Power System Analysis and Control

Guest Editors:

**Dr. Ioana Pisica**

Department of Electronic and  
Electrical Engineering, Brunel  
University London, Uxbridge UB8  
3PH, UK

**Prof. Dr. Sumit Paudyal**

Department of Electrical and  
Computer Engineering, Florida  
International University, Miami,  
FL 33199, USA

**Dr. Oguzhan Ceylan**

Electrical and Electronics  
Engineering Department,  
Marmara University, Istanbul  
34854, Turkey

Deadline for manuscript  
submissions:

**closed (5 April 2023)**

### Message from the Guest Editors

We invite research papers that seek to achieve optimal grid services and solutions, looking at the integral system of generation, transmission, distribution, and consumers. Detailed analyses of transmission and distribution systems with uncertainty both in distributed energy resources and in future demand characteristics are welcome.

Novel research to integrate transmission, distribution, generation, and consumers to achieve system-wide benefits in an energy-exchanging society, developing a novel energy-as-a-service model and peer-to-peer energy transactions is highly relevant as part of power system analysis and control. Topics to be covered in this Special Issue include but are not limited to the following:

- Transmission systems modeling and integration in distribution systems
- Coordinated control approaches both at the transmission and distribution system levels
- Novel control approaches, integrating several smart grid components.
- Novel transmission and distribution level grid services from the aggregation of distributed energy resources and flexible loads, including transactive energy.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
