# Modeling, Optimization and Control in Algal Biotechnology

Guest Editors:

#### Prof. Dr. Štěpán Papáček

The Institute of Information Theory and Automation of the Czech Academy of Sciences, 18200 Prague, Czech Republic

### Prof. Dr. Francisco Gabriel Acién Fernández

Department of Chemical Engineering-CIESOL, University of Almeria, Almería, Spain

### Prof. Dr. José M. Fernández-Sevilla

Department of Chemical Engineering, Universidad de Almería, 04071 Almería, Spain

Deadline for manuscript submissions:

closed (20 July 2022)

# **Message from the Guest Editors**

Dear Colleagues,

This Special Issue, entitled 'Modeling, Optimization, and Control in Algal Biotechnology (Applications of General Principles and Techniques)', aims to publish a set of articles that present 'success stories' of the application of general principles and techniques of mathematical modeling, numerical simulation, optimization, and control theory in the field of algal biotechnology. We intend to showcase the very best insightful and influential examples of the cultivation and utilization of both micro- and macroalgae in a variety of industrial processes.

We would like to include articles that will form a useful benchmark against which other articles are measured. *Energies* readers and authors are encouraged to send their very best work to be showcased. The key criteria for manuscript acceptance will be novelty and the potential contribution to the field.

#### Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

## **Message from the Editor-in-Chief**

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
