Mathematical and Statistical Models for Energy with Applications

Guest Editors:

Prof. Dr. Wing-Keung Wong

Prof. Dr. Faridul Islam

Dr. Aviral Kumar Tiwari

Deadline for manuscript
submissions:

closed (31 December 2020)

Message from the Guest Editors

Dear Colleagues,

This Special Issue considers research on Mathematical and Statistical Models with applications on following, but not limited to, topics:

- model and forecast domestic and international prices, returns, and volatility of energy products and carbon emissions prices,
- include energy products in portfolios and hedging
- study impacts of consuming energy products on environment, sustainability, health, agriculture, etc.

We invite investigators to contribute original research articles that advance the use of mathematics, probability, and statistics in the areas of Energy and Natural Resources with applications. All submissions must contain original unpublished work not being considered for publication elsewhere.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compindex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
