Message from the Guest Editors

Dear Colleagues,

This Special Issue aims at providing recent advancements on open data and models. Energy and Environment are the fields of applications. For all the aforementioned reasons, we encourage researchers and professionals to share their original works. Topics of primary interest include but are not limited to:

1. Open data and models for energy sustainability;
2. Open data science and environment applications;
3. Open science and open governance for Sustainable Development Goals;
4. Key performance indicators of data-aware energy modelling, planning and policy;
5. Energy, water and sustainability database for building, district and regional systems;
6. Best practices and case studies.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
