Small Scale Solar Thermal Energy Storage Systems for Rural Energy

Guest Editor:

Prof. Dr. Ashmore Mawire

Department of Physics and
Electronics, Material Science
Innovation and Modelling
(MaSIM) Research Focus Area,
North-West University, Private
Bag X2046, Mmabatho 2735,
South Africa

Message from the Guest Editor

In this Special Issue, papers addressing the application of small solar TES systems for decentralized rural communities are presented for catering energy demand requirements in rural areas. This is conducted in a bid to promote energy sustainability for rural communities. Different applications of TES are presented, including the following; solar water heating; cooking; power generation; food drying; space heating and cooling; and water purification.

Deadline for manuscript

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
