## Quantum Correlations in Many-Body Systems

Guest Editor:

**Dr. Matteo Fadel**

Department of Physics, ETH  
Zürich, 8093 Zürich, Switzerland

Deadline for manuscript  
submissions:

**31 August 2024**

### Message from the Guest Editor

Quantum correlations provide crucial insights into the most fundamental aspects of nature and represent an essential resource for quantum technologies. In the context of many-body systems, these correlations can appear in complex yet intriguing structures, naturally prompting conceptual questions about their characterisation and quantification.

This Special Issue provides a timely opportunity to present current advances in our understanding of quantum correlations in many-body systems, while also highlighting open questions in the field. Topics covered in this Special Issue include the preparation, detection, characterisation, and quantification of entanglement, Einstein–Podolsky–Rosen steering, and Bell nonlocality in many-body systems. Additionally, it emphasises the role of these correlations in quantum technologies, such as quantum metrology, quantum communication, one- and two-sided device-independent tasks, and randomness generation.

- many-body systems
- multipartite quantum correlations
- entanglement
- Einstein–Podolsky–Rosen steering
- Bell nonlocality

## Editor-in-Chief

### **Prof. Dr. Kevin H. Knuth**

Department of Physics, University  
at Albany, 1400 Washington  
Avenue, Albany, NY 12222, USA

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (*Mathematical Physics*)
