Complexity and Entropy in Biomedical Circuits and Systems

Guest Editors:

Dr. Yu Wu

Department of Electronic and
Electrical Engineering, University
College London, London, WC1E
6BT UK

Prof. Dr. Shuo Gao

School of Instrumentation and
Optoelectronic Engineering,
Beihang University, Beijing
100191, China

Deadline for manuscript
submissions:

closed (15 April 2024)

Message from the Guest Editors

Complexity in biomedical circuits and systems is a burgeoning field of research that explores the intricate and dynamic interplay between biology and engineering.

This Special Issue aims to gather innovative ideas and effective methods based on entropy/information theory/complexity theory from the complex biomedical circuits and systems field. This Special Issue will accept unpublished, original papers and comprehensive reviews focused on (but not restricted to) the following research areas:

- entropy in biomedical systems;
- bio-sensing and microfluidics;
- information theory and bioinformatics;
- neural signal and information theory;
- AI and edge computing for healthcare;
- neuromorphic hardware;
- medical and surgical robots;
- brain and human–machine interfaces;
- personalized medicine;
- CMOS integrated circuit and systems.

Special Issue

entropy

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University
at Albany, 1400 Washington
Avenue, Albany, NY 12222, USA

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (*Mathematical Physics*)
