The Philosophy of Quantum Physics

Guest Editors:

Prof. Dr. Arkady Plotnitsky

Literature, Theory and Cultural Studies Program, Philosophy and Literature Program, Purdue University, West Lafayette, IN 47907, USA

Prof. Dr. Gregg Jaeger

Quantum Communication and Measurement Laboratory, Department of Electrical and Computer Engineering and Division of Natural Science and Mathematics, Boston University, Boston, MA 02215, USA

Message from the Guest Editors

Arguably more than any other physical theory, even relativity (which does offer some competition in this regard), quantum theory, throughout its history, especially after the discovery of quantum mechanics, has been defined by the role of philosophical thinking in it, on the part of physicists and philosophers alike. The aim of this Special Issue is to contribute to this debate by bringing together both physicists and philosophers, working in different areas of quantum foundations, most especially quantum mechanics and quantum field theory, with the aim exploring the deeper foundational questions arising in these areas, and by doing so, rethinking the origins and the nature of quantum foundations themselves.

Deadline for manuscript submissions:

Special Issue

Editor-in-Chief

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (*Mathematical Physics*)
