Message from the Guest Editors

Dear Colleagues,

The financial services market has been significantly affected by the global trend towards digitalisation. It has led to the emergence of new service formats and new target consumers. At the same time, there is an increased demand for new forms of financial services that offer convenience, agility and security. However, these services require financial literacy, which involves enhancing people's financial awareness and financial capabilities.

The main focus of this Special Issue is on these changes, with potential studies focusing on the analysis of digital financial solutions and services, financial culture and literacy, alongside the practical analysis of digital financial projects.

Dr. Ágnes Csiszárík-Kocsir
