## **Small-Scale and Artisanal Fisheries: Approaches for Assessment and Management in a Changing World**

Guest Editors:

**Dr. José Amorim Reis-Filho**

Department of Biological  
Science, Federal University of  
Bahia, Salvador 40170-115, Brazil

**Prof. Dr. Tommaso Giarizzo**

Instituto de Ciências do Mar  
(LABOMAR), Federal University of  
Ceará, Fortaleza, Brazil

**Dr. Antoine O.H.C. Leduc**

Department of Biology, Sultan  
Qaboos University, P.O. Box 36,  
Al-Khoud 123, Oman

Deadline for manuscript  
submissions:

**closed (10 May 2024)**

### **Message from the Guest Editors**

Variability in environmental conditions as a result of climate change and habitat damage has impacted such productive social systems. Coincidentally, man-made activities also threaten fishery resources and their ecosystems. Artisanal and small-scale fisheries are associated with such ecosystems owing to their limited access and facilities. In nations where small-scale fisheries remain unregulated, these ongoing effects are having enormous, unreported impacts on resource stocks and may even mislead the economic assessment of fisheries.

In this Special Issue, we invite authors to submit original articles and reviews in this broad field for assessing and managing small-scale and artisanal fisheries from around the globe. We encourage submissions that offer new insights and approaches that can contribute to improved management and evaluation, rather than descriptive studies simply reporting on fishing activities and catches. The research topic covers novel research on the assessment and monitoring of small-scale fisheries, socioeconomics, governance, trade, and management measures.

## Editor-in-Chief

**Prof. Dr. Maria Angeles Esteban**

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

## Message from the Editor-in-Chief

*Fishes* is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubAg](#), [FSTA](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Marine & Freshwater Biology*)
