## Focus on Supercritical Fluids: Control and Extraction

Guest Editors:

**Dr. Maša Knez Marevci**

Laboratory for Separation  
Processes and Product Design,  
Faculty of Chemistry and  
Chemical Engineering, and  
Faculty of Mechanical  
Engineering, University of  
Maribor, Maribor, Slovenia

**Dr. Darija Cör Andrejč**

Laboratory for Separation  
Processes and Product Design,  
Faculty of Chemistry and  
Chemical Engineering, University  
of Maribor, Smetanova ulica 17,  
SI-2000 Maribor, Slovenia

Deadline for manuscript  
submissions:

**closed (15 February 2024)**

### Message from the Guest Editors

The use of subcritical (SubFs) and supercritical fluids (SCFs) as processing media enables processes at lower operating temperatures without organic solvent residues, and requires lower energy consumption than conventional methods. The final products are solvent-free. Considering these qualities, SCFs could certainly be applied as a replacement for conventional solvents in extractive and non-extractive processes, as nontoxic, inexpensive, non-flammable, and non-polluting solvents. Supercritical fluid extraction (SFE) is a relatively new, innovative and promising separation process in which solids or liquids are processed with SCF to extract soluble compounds from mixtures.

The main objective of this Special Issue is to discuss SubF and SCF and related processes. The focus is on sub- and supercritical extraction, fractionation, and the purification of bioactive compounds and their bioactive activity.

Engineering, University of Bath,  
Bath BA2 7AY, UK

## Message from the Editor-in-Chief

*Fluids* (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q2 (*Mechanical Engineering*)
