Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### Message from the Guest Editor

Dear Colleagues,

The droplets and bubbles are ubiquitously present in natural and engineering processes including raindrops on soil, jet droplets from breaking waves, transmission of respiratory diseases, inkjet printing, combustion, spray cooling, anti-icing, additive manufacturing, and surface coating. The dynamics of droplets and bubbles play critical roles in these processes, therefore understanding of droplet and bubble dynamics in various types of fluids is of great significance. This Special Issue aims to gather a wide variety of papers that focus on the dynamics of droplets and bubbles. Potential topics include but are not limited to droplet deformation, rising droplets, droplet coalescences, droplet breakup, bubble collapse, droplet media interaction, droplet/bubble produced from capillary focusing phenomena, and droplet/bubble transport in microsystem.

Dr. Hua Tan

## Message from the Editor-in-Chief

*Fluids* (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q2 (*Mechanical Engineering*)
