Madrid (UCM), 28040 Madrid,
Spain

Dr. Alejandro Garrido-Maestu

Food Quality and Safety
Research Group, International
Iberian Nanotechnology
Laboratory (INL), Braga, Portugal

Dr. Alexandre Lamas

Department of Analytical
Chemistry, Nutrition and
Bromatology, University of
Santiago de Compostela (USC),
27002 Lugo, Spain

Message from the Guest Editors

Every year, many cases of foodborne illnesses are registered globally, which could be avoided with more rigorous foodborne pathogen evaluations that ensure security along the complete food supply chain. On the other hand, the potential fraud and/or adulteration of food products should be tracked to ensure the transparency of the sector and to protect natural resources and consumers' rights. For this control to be possible and adequate, having fast, portable, and cost-effective technologies that can be applied in any point of the supply chain is essential. There is an urgent need to develop new rapid detection and identification tools that allow the monitoring of a food product, its components, and its potential pathogens from the origin of the raw materials to its final point of sale. This Special Issue will examine the new methodologies for rapid detection and identification that have been developed with the aim of promoting and improving control and food safety.

Deadline for manuscript
submissions:

12 July 2024

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (Health Professions (miscellaneous))
