2. Allergy Data Laboratories (ADL), 04100 Latina, Italy

Deadline for manuscript submissions:

15 August 2024

Message from the Guest Editor

Food allergy represents a burgeoning health crisis. Its prevalence has surged rapidly in recent decades, and likewise, research in the field of food allergy is increasing. Meanwhile, vital progress has been made regarding the characterization of food allergens, the study of their immunological properties, and their detection in natural sources and in processed products.

Known food allergens belong to a relatively restricted number of protein families, characterized by biochemical and physicochemical properties that may or may not include thermal stability and resistance to proteolysis. The allergenicity of a food protein cannot be predicted. However, determining whether it belongs to a certain family of allergenic proteins enables us to understand whether a molecule is possibly predisposed to becoming an allergen; this represents an important first step, and may contribute to determining the allergenic risk.

The aim of this Special Issue of Foods is to gather and present cutting-edge research on the properties and molecular characteristics of food allergens. This Special Issue welcomes the submission of original research articles and reviews on this topic.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.**

Journal Rank: JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Health Professions (miscellaneous)*)
